

TRẦN NHỰT ANH

Backend Developer (Go)

PERSONAL PROJECTS

Ecommerce APIs Systems

- Overview: Developed a microservices-based ecommerce platform with multiple independent services to handle various functionalities.
- Product Service:
 - Implemented using Go's standard library.
 - Managed interactions with a MySQL database via SQLC for efficient query handling.
 - Developed a file server for handling and storing product images.
- Order Service:
 - Built using the Gin framework for rapid development.
 - Employed Gorm as the ORM to handle database interactions.
- Auth Service:
 - Implemented with Gin and Gorm to manage user authentication and authorization.
 - Integrated JWT authentication to ensure secure access to APIs.
- Technologies: Go, MySQL, SQLC, Gin, Gorm, JWT

Point of Sale System

- Overview: Developed a comprehensive Point of Sale system with a robust backend and an interactive frontend to streamline retail operations.
- Backend:
 - Implemented APIs using Java Spring Boot, with MySQL as the database.
 - Utilized Hibernate ORM for seamless database management.
 - Integrated JWT for secure authentication and authorization.
- Frontend:
 - Built with ReactJS to create a responsive and user-friendly interface.
 - Consumed backend APIs for real-time data interaction.
- Deployment:
 - Containerized the application using Docker.
 - Deployed to Render.com for scalable and reliable hosting.
- Additional Features:
 - Implemented an email service to handle account confirmation and user notifications.
- Technologies: Java, Spring Boot, Hibernate, MySQL, ReactJS, Docker, Render.com, JWT

EDUCATION & ACADEMIC RECORDS

Ton Duc Thang
University

Recursion - Coding
game
18-25/05/2024

Undergraduate students

Latest GPA: 7.29/10

Achievements

Reached to final round the contest, despite having any prior experience of competitive programming

ABOUT ME

I am looking forward to being a Software Engineer in the future. Eager to learn latest technologies

TECHNICAL SKILLS

- Java
 - Spring Boot
 - Hibernate
- JavaScript
 - ReactJS (Material UI, Antd, tailwindcss)
- Go
 - Gin
 - Standard Library
- Docker
- API testing and documentation with Swagger and Postman
- English: Proficient in reading and listening; intermediate in speaking
- Basic in Data Structures and Algorithms
- Persistence: MySQL, MongoDB, MSSQL, Redis
